BIOSERUM LABORATORIOS S. L.

INTRODUCTION.

THE COMPANY.

Bioserum Laboratorios S.L., the company, was founded by José Maria Tardido and his brother Jesús. Both were doctors who, more than 25 years ago and disillusioned by the problems and side effects of some conventional drugs, resolved to create balanced natural formulae using their knowledge of the pharmaceutical properties of herbs and other ingredients.

Originally only available to the doctors' own patients, a chance conversation with one of these patients about the success of the formulae, led to the forming of a company to produce them on a larger scale to the very exacting standards its founders demanded.
